OBJECTIVE

As a passionate Front End Developer with a keen eye for design and a strong foundation in web development, I am eager to leverage my skills to bring value to COMPANY . I am committed to building user-friendly, visually appealing web apps that effectively convey a company's message and bring out its unique identity. I am excited to apply my expertise to contribute to your team and to help create innovative web solutions that make a real difference in people's lives.

EXPERIENCE

Whaleportal | Frontend Engineer

2021 - 2022

- Developed Whaleportal single-handedly from zero, collaborating closely with the project's founder to bring his vision to life.
- Developed front-end using **React.js** and **SCSS**, with **TailwindCSS** to speed up development. Utilised the **Chart.js** library to visualise data from multiple **APIs**. Processed and format the data with **Node.js** for each custom chart and stored it with **Firebase**.
- Whaleportal has attracted **42.9K visitors** since its launch, providing essential market information for cryptocurrency traders.

SOCIALS/PORTFOLIO

SKILLS

- React.js |TypeScript |Next.js
- TailwindCSS | SASS | CSS
- Git | MongoDB | Firebase

CERTIFICATIONS/BOOT CAMPS
